ELECTIONS ARE SECURE AND ACCURATE

Tabulation equipment is certified by the Washington Secretary of State and the federal Election Assistance Commission. The system is never connected to the internet.

Logic and Accuracy

- Before each election, a public logic and accuracy test is conducted to ensure that voting equipment is ready for use and properly prepared to count ballots.
- The logic and accuracy test is verified by independent observers and the Office of Secretary of State.

Post-Election Audit

- Post-election audits are conducted prior to the certification of each election.
- The office to be audited is selected by political party and nonpartisan observers.
- Batches to be audited are randomly selected.
- The audit compares the vote totals from the tabulation system to a hand count of physical ballots.

To learn more or to view a logic and accuracy test or a post-election audit, please contact the elections department at: (509) 545-3538 or email elections@co.franklin.wa.us

Statement

Moving to Franklin County from Idaho in the late 50's as part of the Columbia Basin Project, my family as most were WWII Vets looking to make something out of mostly nothing, just sand. The values that I learned from my parents and those pioneers, set a foundational belief in me of our Constitution and God given rights that these and others before them had fought for. I believe in these rights and will stand to protect and preserve them at all cost.

Coming out of Retirement and being appointed by the Commissioners to the position of Assessor. I immediately went to work to establish a set of Core Values for the Office, establishing guidelines for *Ethics, Fairness, Honesty* and *Integrity*, built on *Caring, Courtesy* and *Respect*. Focusing on never being satisfied with the status quo and continually setting high measurable goals that we hold our selves accountable to.

I will strive to earn your *trust, confidence, respect* and *support*, while never compromising my Constitutional Oath and Value's. I will continue to upgrade and develop the Assessor's office into one that is adequately staffed, highly trained and equipped to meet the responsibilities of serving the residents of Franklin County.

Over 30 years experience as a mechanical engineer; small business owner; licensed mechanical engineer in Washington; fluent in the Spanish language; Leadership Tri-Cities Class XXII.

Education

Graduate of Royal High School, Royal City, Washington; Bachelor of Science degree from Brigham Young University, Provo, Utah.

Community Service

Served as church leader in local congregation; many years working with church youth groups; served as Scoutmaster; Chairman of White Bluffs District, Boy Scouts of America; Pasco Youth Football board of directors.

Statement

Education is vital to our success both as a community and as a country. For the past 8 years I have served on the Pasco school board, working together with district leadership to determine the best educational vision and priorities for the success of our children. This past year has been especially challenging, but we are moving forward again. I am committed to taking the lessons we have learned from this experience and building on them to make our education system even better.

I believe we need a strong public education system that serves all of our children – one that will prepare them to make good decisions. Our students not only need education in reading, writing, math and science, but civics and social studies as well. This will require board members, district administration and the community working together to make sure our education system in Pasco is effective.

I am asking for your support to return me to the board. It is my goal to continue to work on needed improvements while highlighting and building on the many good things that are happening in our school district.

Statement

I'm Steve Simmons. Raised in Kennewick our family has lived in Pasco for 13 years. Next year all four of our children will attend school in the Pasco School District, one of which is a special needs student. I have a vested interest in the educational success of our district. I attended trade schools to become an electrician and believe in educational pathways such as apprenticeships, technical career training, and college. This past year has highlighted the need for elected officials who represent us using facts, ethics, principles, and morals. I'm tired of standing on the sidelines while our children's future is decided for us. Ideology, trends, and virtue signaling tend to be more important than the bottom line - to provide basic education and guide career pathways according to the interests and desires of each of our children and their unique personalities, traits, and talents. As an elected school board member I pledge to be knowledgeable on the issues and use unbiased opinions, mature judgment, and my conscience in making rational decisions towards accomplishing the goals and upholding the laws of our district for the benefit of all faculty, parents, and students. Student Achievement: Strategic plans with measurable outcomes; State of the School reviews at each school; Superior hiring practices; Academic excellence through effective professional learning committees; Policies to ensure regular curriculum review and replacement; Dual Language Program expansion enabling every child to graduate bi-lingual if desired; More nurses and counselors to support the whole child.

Community Service

Statement

I believe our students need to return to in-person education as much as possible but this time with local control by parents and students over school choices and school funding.

Students were not given a choice in Pasco last year whereas other districts were. The Washington Achievement Council reported high school students failing to earn grades up 42% over last year.

In 2020, the CDC compared 2019 and reports mental health related visits to the E.R. increased 24% in ages 5-11 and 31% ages 12-17.

Greater numbers of families and students are leaving public schools which means lower enrollment, less funding, less for students. It's time for local driven choices by parents and students to fund and drive their future and its time school boards to clear the way for trades and higher educational opportunities.

On-line education may be a better choice for some students but far too many of these decisions are being made for you while you foot the bill. Shouldn't it be your choice, your school? As your next School Board member I believe it is. I'm Michelle Andres and I ask for your vote. Thank you.
